

VIKING+

COUNTING, SPEED STUDIES, PEEK TRAFFIC TIME
AND LOCAL TRAFFIC VOLUME

- Fast and easy installation on the roadside for maximum user safety
- Intuitive interface with graphical screen
- Real time on screen data visualisation
- Built-in **GPS**
- Clock synchronisation
- GPS location
- Low energy consumption: up to 6 months of continuous use
- Up to **16 Gb** memory capacity with SDHC card
- Counting for one single lane or both lanes
- Easy analysis of the data in a few clicks with is dedicated software **THOR**
- Delimited text file, compatible with any spreadsheet (Open Office, MS Excel)

IP68 casing

measure precision:

- date and time: 1/100 of a second
- speed: $\pm 1\%$ (± 0.5 unit)
- volume: $\pm 1\%$ (non saturated traffic)
- classification: 2-wheelers/LGV/HGV $\pm 5\%$

After a quick installation of our above ground sensor next to the roadside, VIKING + will record the hour, direction, speed and vehicle class for each vehicle. This is a perfect tool to watch over our roads at a minimum cost!
